**DEFINITION:** This is administrative, planning, and management work with responsibility to assist in managing the daily operations of Provo City’s water reclamation plant.

**CLASSIFICATION STANDARDS:** The single position allocated to this class is responsible to the Water Reclamation Plant Manager and performs all tasks under his/her general direction. The work of this class is distinguished by its responsibility to assist with comprehensive oversight of the daily operations of Provo City’s water reclamation plant.

**ESSENTIAL DUTIES:** Oversee and direct assigned activities, programs, and employees of the water reclamation plant; ensure plant compliance with EPA and State regulations; maintain and oversee assigned permit programs including, but not limited to, Pollution Discharge Elimination, Storm Water, and Bio-Solids; assist in directing plant and laboratory operations and establishing efficient processes for preliminary treatment, primary sedimentation, filtering, sludge, solids, disinfection, digestion, disposal, and data collection and sampling; resolve complex operational issues; assist in overseeing plant improvements and construction projects; assist in evaluating bids provided by contractors and suppliers; inspect plant processes and equipment to ensure efficient operation; makes recommendations to enhance process performance.

Supervise, plan, and coordinate the work of assigned personnel and ensure work is completed accurately and efficiently; assist in making staffing decisions including hiring and firing staff; identify, evaluate, and resolve personnel concerns; conduct performance evaluations and enact discipline and/or employee recognition as needed; oversee and direct the training and development of assigned personnel; ensure compliance with the City’s personnel policies and procedures; supervise record maintenance and review all reports, logs, work records, and documentation of subordinates; develop and manage safety programs for assigned personnel, including the coordination of all applicable risk management issues.

Assist in developing and managing the overall section budget, including oversight of assigned areas to ensure fiscal responsibility; propose and approve specifications for assigned contracts and equipment purchases; develop, submit for review, and implement service programs, policies, procedures, and goals; ensure overall compliance with applicable ordinances, and local, State, and Federal regulations; ensure appropriate documentation of program activities; review logs and reports to identify and resolve inefficiencies; prepare a variety of records and administrative reports on section activities and performance; maintain vehicle and equipment inventory; may perform the tasks of operators, act as the manager in his/her absence, or other duties as needed.

**MINIMUM REQUIREMENTS:** Equivalent to a high school diploma; and six (6) years of professional water operator experience, two (2) years of which must have been in a program management/ supervisory capacity. Additional education may be substituted for non-supervisory experience as allowed by the State of Utah for unrestricted wastewater operator certification.

**Licenses/Certifications:** Unrestricted Grade IV Utah Wastewater Systems Operator. A valid, lawful commercial driver’s license is required.
SELECTION FACTORS: Knowledge of: methods and techniques used in the operations and maintenance of a water reclamation plant; related laws, codes, rules, and regulations governing the functions of the position; budget preparation and administration processes; related laws, codes, rules, and regulations governing functions of the position; the electrical and mechanical operations and maintenance of specialized treatment plant equipment; basic English composition, spelling, and grammar; policies and procedures established for the work system including handling chemicals and sample collection. Skill in: interpersonal relations and management as applied to the direction and supervision of employees; using a variety of power tools, hand tools, and other heavy equipment safely in a hazardous environment; recognizing potential dangers and responding appropriately; troubleshooting electrical and mechanical issues. Ability to: operate process equipment, electrical controls, valves, and pumps; monitor gauges, meters, and controls; recognize change in normal conditions and investigate the cause; recalibrate process and equipment settings in the field; inspect the plant for overall condition; perform work with speed and accuracy; communicate effectively both verbally and in writing; deal with the public and others in a pleasant, courteous, and calm manner in all circumstances and always maintain effective working relationships; exercise independent judgement while evaluating situations and in making determinations; organize assigned work and develop effective work methods; prepare clear, concise, accurate, and informative reports; perform duties in a manner that demonstrates respect, integrity, courtesy, and kindness towards others; demonstrate a high level of commitment to the principles of positive customer service; lead the work of others.
