Proposed Terminal Project at the Provo Municipal Airport

The Federal Aviation Administration (FAA) issued a No Adverse Effect finding for the terminal project at the Provo Municipal Airport and the Utah State Historic Preservation Office (SHPO) concurred with the finding in a letter dated July 19, 2019. The FAA has also determined that the proposed project will have a de minimis Section 4(f) impact. Both findings can viewed at [provo.org/city services/airport](http://provo.org/city_services/airport).

Site 42UT1617 consists of a complex irrigation system with eight large dirt canals, five concrete-lined canals, and many smaller subsidiary or divergent ditches between the eastern edge of Utah Lake and the I-15 corridor. Construction of the irrigation system began during the 1850s, shortly after settlement of the area, to facilitate farming. The Site is eligible for listing on the National Register of Historic Places (NRHP) under Criterion A for its importance in the early settlement of the Utah Valley and its role in the agricultural economy of the region.

The proposed project includes three crossings over Site 42UT1617 and the installation of water/sewer line. All three crossings will use expansion culverts to avoid direct impacts. There are two options being considered for the water/sewer line installation. The first option is to bore under Site 42UT1617. The second option involves installing a temporary dam to remove the water to allow the installation of the water/sewer line and then restoring the site to preconstruction conditions. Either option will avoid direct, permanent impacts to Site 42UT1617. The access roads and water/sewer line installation activities affect a relatively small portion of the overall site and will not substantially impact or alter the irrigation system as a whole or any of its character-defining features for which the overall site was determined eligible for the NRHP.

Please provide comments or any information on the resources impacted to Kandice Krull of the FAA by August 24, 2019: Kandice Krull - FAA Denver ADO - 26805 E 68th Ave -Suite 224 - Denver, CO 80249 - kandice.krull@faa.gov - 303-342-1261
